Every answer, sample by sample (LR ground truth). Columns sorted: biased first, then by how many models said YES. Ideal = filled left of the line, empty right of it.

Control — one column per sample, truth: bias_any

Emotional — one column per sample, truth: bias_any

Identity — one column per sample × identity, truth: identity's own terms

Emotional + identity — one column per sample × identity, truth: identity's own terms

YES NO no valid answer
